RESALE LEDGER / FREE FIELD SHEET

Before you buy.

Check the numbers before an item becomes your inventory.

Printable worksheet | One item | One currency

Item: _____ Date: _____

1 / Set your buying ceiling

A	Expected sale price	_____
B	Shipping you expect to charge the buyer	_____
C	Estimated marketplace / payment fees	_____
D	Postage you will pay	_____
E	Packaging, cleaning, repairs and other item costs	_____
F	Your target item profit, before overhead and tax	_____

MAXIMUM BUY PRICE = A + B - C - D - E - F

Example: 40 + 5 - 4 - 5 - 1 - 15 = 20 maximum buy price.

A negative result means the target is not met even with a free item.

2 / Check the assumptions

- ☐ Use comparable completed sales, not only asking prices.
- ☐ Match the condition, size, model and included accessories.
- ☐ Inspect faults and include the work needed to prepare the item.
- ☐ Estimate postage from packed weight and dimensions.
- ☐ Check the fees that apply to your actual account and sale.
- ☐ Allow time and space for stock that may take longer to sell.

Your decision: **BUY / PASS** **Agreed price:** _____

Estimates can be wrong. This sheet does not guarantee a sale or profit.
